DETAILED ACTION

1. This application is a national stage entry (371) of PCT/JP05/00339, filed on January 14, 2005.
2. Claims 1-8 are currently pending.

Election/Restrictions

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5 & 7, drawn to a repetitive control device comprising a feedback signal system comprising a filter which has, as a delay element, a memory which stores signal information for one rotation of a disc into divided plural memory areas of the memory.

Group II, claim(s) 6 & 8, drawn to an optical disc device including an integral term operation part of a PID servo filter, which performs an arithmetic processing using a clock signal.

4. The inventions listed as Groups I & II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: (a) Group I lacks the special technical feature "an integral term operation part of a PID servo filter, which performs an arithmetic processing using a clock signal" of Group II, and (b) Group II lacks the special technical feature "a filter which has, as a delay element, a memory which stores signal information for one rotation of a disc into divided plural memory areas of the memory" of Group I.
5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
